MOHD UVAISH

FULL-STACK WEB DEVELOPER

Dehradun, Uttarakhand | +91-7983009043 | mohd.uvaish.malik79@gmail.com
github.com/techuv4-dotcom

PROFESSIONAL SUMMARY

Full-Stack Web Developer with hands-on experience building and maintaining web applications using React.js, TypeScript, Node.js, NestJS, and SQL databases. Experienced in REST API integration, authentication and authorization, database modeling, responsive UI development, and production-facing application workflows. Contributed to live web platforms involving service discovery, booking management, payment integration, and administrative systems.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL

Frontend: React.js, Tailwind CSS, CSS, React Router, Formik, Yup

Backend: Node.js, NestJS, Express.js

Database and ORM: MariaDB, MySQL, MongoDB, Redis, TypeORM

APIs and Security: RESTful APIs, Axios, JWT, OTP Verification, Role-Based Access Control (RBAC)

Tools and Deployment: Git, GitHub, Postman, Cloudinary, Render, Nginx, PM2, AWS (Basic), Razorpay

PROFESSIONAL EXPERIENCE

Full Stack Web Developer **April 2026 – Present**
Wagzen Technology Pvt. Ltd.

- Develop and maintain web applications using React.js, TypeScript, NestJS, TypeORM, and MariaDB.
- Contribute to Housecaller, a live home services platform, building responsive service listings, category navigation, search, and service detail interfaces.
- Integrate REST APIs for customer authentication, OTP verification, address management, service discovery, bookings, and order creation.
- Implement checkout workflows with Razorpay payment integration and Cash on Delivery support.
- Develop booking-related features, including service and professional reviews, invoice downloads, and location-based functionality.
- Build features for the Freyza Salon Admin Management System, including service management, bookings, website content, authentication, and role-based permissions.

SELECTED PROJECTS

Housecaller – Live Home Services Platform
React.js, TypeScript, JavaScript, Axios, REST APIs, CSS

- Developed responsive service discovery interfaces with category navigation, search, and service detail pages.
- Integrated APIs for login, OTP verification, address management, booking, and order creation; worked on payment, booking details, reviews, and invoice flows.
- Improved mobile responsiveness, loading states, and location permission handling.

Freyza Salon – Full-Stack Admin Management System
React.js, TypeScript, Tailwind CSS, NestJS, TypeORM, MariaDB, JWT, Nginx, PM2

- Developed an admin system for salon operations and website content management, including users, services, categories, bookings, gallery, and blog.
- Implemented JWT authentication, role-based access control, and module-level View, Create, Update, and Delete permissions.
- Designed REST APIs and relational schemas; implemented image upload and preview workflows and deployed using Nginx and PM2.

Twitter Clone – Full-Stack Social Media Application
React.js, TypeScript, NestJS, MariaDB, Redis, JWT, Cloudinary, Tailwind CSS

- Developed APIs for tweets, profiles, bookmarks, and user interactions with JWT authentication and protected routes.
- Integrated Cloudinary for media storage and Redis for caching; deployed frontend and backend services on Render.

EDUCATION

Master of Computer Applications (M.C.A.) **2022 – 2024**
Graphic Era University

Bachelor of Computer Applications (B.C.A.) **2018 – 2021**
CCS University
